Algiers, Algeria · Open to relocation (Canada, Gulf) and remote work

PROFESSIONAL SUMMARY

Technical project manager with a full-stack engineering background and a Master's degree in Computer Systems. 2+ years building web, desktop and mobile products end to end: specification, code, UI/UX, testing and delivery. Currently Assistant Project Manager at Kyo Conseil, turning client requirements into specifications and running agile sprints, while working freelance as a full-stack web developer for Olten Agency. Experienced in remote, multicultural teams in Arabic, French and English.

PROFESSIONAL EXPERIENCE

Assistant Project Manager | SARL Kyo Conseil — Algiers, Algeria Aug 2026 – Present

- Translate client requirements into functional specifications (cahier des charges, UML) and run agile sprint cycles for cross-functional engineering teams.
- Track deliverables against release dates; coordinate development, design and QA workstreams on client platforms.
- Act as the technical bridge between clients and developers, anticipating risks and technical constraints before they impact delivery.

Full-Stack Web Developer (Freelance) | Olten Agency — Remote Nov 2025 – Present

- Build the agency's digital products, including an ERP platform and a rental & carpooling marketplace (Laravel, WinForms/.NET, MySQL).
- Design the interfaces behind them in Figma — wireframes, high-fidelity prototypes and design systems handed off to production.

Web Developer | Techitaway Jul 2024 – Jul 2026

- Developed core enterprise features on Laravel/PostgreSQL, including responsive interfaces and backend query optimization on production data.
- Improved application performance through query tuning and code refactoring on the product's most-used modules.

MERN Stack Intern | SARL Art Promotion Mar 2024 – Jun 2024

- Built a catering management platform end to end (React, Express, MongoDB); owned the frontend architecture and coordinated task assignment within the team.

PORTFOLIO

49 projects and 21 delivery documents — specifications, Gantt plans, UML architecture, test campaigns and severity-classified bug reports — at massaid-safia.netlify.app.

SKILLS

Project Management: Agile/Scrum, sprint planning, requirements engineering (cahier des charges), feasibility studies, UML, Gantt, RACI, Jira, Confluence, Trello, Asana

Front-End: React, Vue.js, JavaScript (ES6+), Tailwind CSS, HTML5/CSS3, SCSS, Bootstrap 5

Back-End & Desktop: Laravel/PHP, Node.js/Express, Python (Flask), ASP.NET Core, C# WinForms, REST APIs

Databases: PostgreSQL, MySQL, MongoDB, Redis

UI/UX Design: Figma, Adobe XD, wireframing, prototyping, design systems

QA & Testing: Functional & regression testing, API testing (Postman), load testing (Locust), TestRail, severity-classified bug reports

EDUCATION

Master's Degree — Computer Systems | Université Mouloud Mammeri, Tizi-Ouzou, Algeria 2024

Bachelor's Degree — Computer Systems | Université Mouloud Mammeri, Tizi-Ouzou, Algeria 2022
